

Clark County Regional Support Network Policy Statement

Policy No. 47
Policy Title: Recovery Vision
Effective Date: 09/01/2001

Policy: Provider agencies that contracted with Clark County PHP/RSN will provide a full range of continuum of crisis, outpatient, residential and inpatient services, designed from a recovery oriented perspective, to all eligible persons living in Clark County.

Reference: Clark County RSN Mission Statement.

Recovery Vision Statement: Recovery requires recognition by everyone of each person's unlimited potential. It compassionately encourages self-determination, through respect, support, meaningful choices and understanding. Recovery is maintained and achieved through a continuum of connected, relevant supportive, individualized services and is reflected in all related language.

Principles and Values for Recovery:

1. All people function on a continuum of wellness and move back and forth on that continuum.
2. Our expectation is that all people will return to a higher place on that continuum.
3. Mental illness is an event on that continuum. It does not define the person.
4. We recognize and value each individual's human experience.
5. The person receiving the services controls the recovery process.
6. The mental health system and the person receiving services are a part of the entire community, not a segregated entity. Services offered should be integrated with the community at large.
7. The mental health system shall recognize the various life domains of each person. Services delivered will connect the individual with the community to enrich each of these life domains. This connection moves the individual higher on the wellness continuum.

Procedure: Provider agencies shall provide services and interventions that are strength-based and promote recovery principles and values as outlined above. *(Please refer to the following references):*
